

# Albert Park Primary School Risk Management POLICY

## Rationale

Victorian Government schools have an important responsibility for keeping children safe. They need to assess, identify and document the school's risks in relation to child safety, and plan and document risk management strategies where necessary.

## Aims

- To be proactive management of risk and opportunities
- To improve planning and decision making to improve educational outcomes

## Implementation

Management of risk is everyone's responsibility. A critical element of delivering effective risk management is to apply the standard process in all areas. This can include:

- occupational health and safety risk management for staff and students
- emergency management planning and incident reporting
- financial management planning including school council financial audits
- the School Accountability and Improvement Framework
- school council governance processes

Albert Park Primary will use the following process to identify and remove or reduce risks to child safety (including the risk of child abuse):

1. Identify the school's child safety risks across the range of school environments (including excursions, camps, online) using the DET risk assessment template.
2. Identify any existing risk mitigation measures or internal controls.
3. Assess and rate the school's child safety risks given the existing controls in place, taking into account the likelihood of risk, and the likely consequence of the risk.
4. If the risk rating is more than the 'acceptable level', identify further risk management strategies through additional controls or other prevention, detection or mitigation strategies and then re-assess the risk. The risk management process will be documented, recorded and reviewed periodically.

Effective risk management strategies are dynamic and change over time as new risks arise and others may no longer be relevant. Effective risk management strategies need to be transparent, well understood and diverse, to take account of the increased level of risk associated with the specific nature of some activities and the vulnerability of particular groups

## Evaluation:

This policy will be reviewed as part of the school's three-year review cycle and as required by developments in relevant legislation or DET guidelines.
